

Project Demo Planning

Date	15 March 2026
Team ID	XXXXXX
Project Name	HUMAN DEVELOPMENT INDEX (HDI)
Maximum Marks	1 Mark

Project Demo Planning:

A well-planned demonstration was prepared to showcase the complete functionality of the HDI Predictor System. The demo covers the project motivation, system architecture, Machine Learning workflow, live prediction process, dashboard features, and final outcomes. Responsibilities were distributed among the team members to ensure a smooth and effective presentation.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project, explain the problem statement, objectives, and expected outcomes.	2	DVL Raghava
2	Solution Overview	Explain the system architecture, dataset, preprocessing, Machine Learning model selection, and overall workflow.	3	D. Niharika Tejaswi
3	Live Feature Demonstration	Demonstrate the application by performing HDI prediction, dashboard visualization, AI insights, history, and export features.	5	DVL Raghava
4	Backend & API Explanation	Explain Flask backend, REST API endpoints, model integration, and validation process.	2	D. Niharika Tejaswi
5	Testing & Results	Present model comparison, prediction accuracy ($R^2 = 0.9856$), testing results, and deployment readiness.	2	DVL Raghava
6	Conclusion & Q&A	Summarize the project, discuss future enhancements, and answer audience questions.	1	DVL Raghava & D. Niharika Tejaswi

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Briefly explain the motivation, objectives, and scope of the HDI Predictor System.
2	Solution Overview	Present the architecture, Machine Learning workflow, and technologies used.
3	Live Feature Demonstration	Perform a real-time HDI prediction, show the

		dashboard, gauge chart, AI insights, prediction history, and CSV/PDF export.
4	Q&A Session	Respond to questions related to the dataset, model selection, backend integration, frontend features, and future scope.
