

Project Design Phase

Problem – Solution Fit Template

Date	30 JUNE 2026
Team ID	
Project Name	Human Development Index (HDI) Predictor
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The **Human Development Index (HDI) Predictor** is designed to address the limitations of traditional HDI analysis by providing an AI-powered prediction system. It enables governments, policymakers, researchers, and educational institutions to analyze socio-economic indicators efficiently, generate accurate HDI predictions, visualize insights through interactive dashboards, and support evidence-based policy planning.

Purpose

- ☐ Automate HDI prediction using Artificial Intelligence and Machine Learning.
- ☐ Reduce manual effort, calculation errors, and processing time.
- ☐ Improve the accuracy and reliability of socio-economic analysis.
- ☐ Deliver interactive dashboards, visual reports, and country-wise comparisons.
- ☐ Support informed policy decisions through scalable and data-driven insights.
